

ProMaster Model Configurations

Notes:

- Low Roof vs High Roof are distinguished by the height above the windshield/window areas
- 118"WB has a shorter sliding door than the rest of the models
- 118"WB vs 136"WB is distinguished by the black trim between the wheel arches – on the 118"WB it continues directly into the wheel arch, on the 136" it stops before the arch
- The 136"WB vs 159"WB is distinguished by the length of the body between the sliding door and the rear wheel arch
- The 159"WB vs 159"WB EXT is distinguished by the length of the body after the rear wheel arch

118"WB (available in LR only)

136"WB (available in LR or HR)

159"WB (available in HR only)

159"WB EXT HR (available in HR only)
